

**QNX(R) RUNTIME BUNDLE LICENSE
AGREEMENT FOR SOFTWARE DEVELOPMENT
PLATFORM 8**

BACKGROUND. This Runtime Bundle License Agreement ("**RBLA**"), together with the other terms and conditions of the QNX Development License Agreement posted at: http://www.qnx.com/commercial_qdl or an alternative negotiated and signed development license agreement ("**QDL**") which has been entered into between the Customer and the relevant BlackBerry entity identified in the QDL ("**BlackBerry**") authorizes Customer to distribute copies of certain Runtime Components of Software as part of your Target System, provided that Customer first purchases the corresponding number of copies of the Runtime Configurations Customer requires (the "Runtime Bundle License"), and by signing the relevant Order and returning such signed Order to BlackBerry.

FOR CLARITY AND NOTWITHSTANDING ANYTHING ELSE HEREIN, CUSTOMER HAS NO RIGHTS UNDER THIS RBLA UNLESS AND UNTIL CUSTOMER AGREES TO THE TERMS AND CONDITIONS OF THE QDL AND RBLA AND CUSTOMER PURCHASES THE APPLICABLE NUMBER OF RUNTIME CONFIGURATION DISTRIBUTION RIGHTS AND SIGNS THE ORDER AND RETURNS IT TO BLACKBERRY.

This RBLA, and the signed Order, are incorporated into the QDL solely for the purposes of this RBLA. The provisions of the Order will prevail in the event of a conflict between the provisions of this RBLA and the QDL. The provisions of this RBLA will prevail in the event of a conflict between any of its provisions and the QDL.

TERMS AND CONDITIONS.

1. **DEFINITIONS.** All defined terms in the QDL will have the same meanings in this RBLA. The following defined terms are added to this RBLA and will have the same meanings throughout the RBLA.

"**Cores**" means, (i) with respect to licensing of QNX Hypervisor Software and associated Runtime Subsystems, the number of physical or virtual processor cores found on the Target System that can be supported by the QNX Hypervisor, or (ii) with respect to licensing of QNX operating system Software and associated Runtime Subsystems, the number of processor cores on the Target System, whether physical or virtual, that are assigned for use by such operating system Software.

"**EULA**" means a properly completed version of the sample BlackBerry End User License Agreement provided in Appendix I (Form of BlackBerry Pass-Through EULA for Target Systems) of this RBLA.

"**Order**" means for the purpose of this RBLA any order placed with BlackBerry (or its Authorized Reseller) for licenses to reproduce and distribute of Runtime Components of the Software as part of Target System. "Runtime Component" is the lowest granularity part of the Software that can be distributed as part of the Target System and it consists of one or more Runtime Subsystems. The Order will specify: 1) the specific Runtime Configuration and its Runtime Components; 2) the specific number of copies of the Runtime Configuration authorized; and 3) whether or not the Runtime Configuration is limited to use with a specific, maximum number of Cores.

"**Runtime Configuration**" means a specific set of Runtime Components identified in an Order and must consist of only Commercially Released Software.

2. **DISTRIBUTION LICENSE.** Notwithstanding the restrictions in the QDL associated with any distribution of or commercialization of the Software (including any Software components), if Customer has purchased a license for reproduction and distribution of Runtime Components as evidenced by the properly executed and returned Order, then subject to the terms and conditions herein, including the Customer's payment when due of all applicable license fees specified on BlackBerry's (or its Authorized Reseller's) invoice for the Runtime Bundle Licenses Customer has purchased ("**Runtime Bundle License Invoice**"), which is hereby

incorporated into this License), BlackBerry hereby grants to Customer a limited, non-exclusive, non-sublicensable, non-transferable and indivisible license for the following specific activities and purposes to:

- (a) Reproduce in strict accordance with the License Parameters specified in the Order, as an integral part of or solely for use in Target Systems, up to the aggregate total number of copies of Runtime Configuration copies purchased, for the purpose of manufacturing and distributing Target Systems. Note that some Target Systems may require more than one Runtime Configuration license (e.g., Target Systems may contain multiple processors, each running a separate copy of the same Runtime Configuration or different Runtime Configurations), therefore Customer must purchase the appropriate number and/or type of Runtime Configuration copies for its specific distribution case;
- (b) reproduce, as part of the Target System backup media (if any), to be shipped with the Target System, a second copy of the Runtime Configuration for each copy authorized under Section 2(a) solely for use for Target System back-up purposes (i.e., not for productive use, such as in a redundant system);
- (c) distribute Runtime Configuration copies made under Sections 2(a) and 2(b) directly or indirectly to end users as part of and only for use in association with Target System subject to the terms and conditions of the EULA; and
- (d) adopt and reproduce (as provided in Sections 2(a) and 2(b)), and to distribute (as provided in 2(c), or pursuant to secure downloads, only to authorized end users for use in licensed Target Systems) object code copies of: (i) patches, solely for the purpose of adopting error corrections for use in new and existing Target Systems; and (ii) Updates, if Customer is entitled to such Updates pursuant the QDL.

In addition to the restrictions and prohibited activities stated in the QDL, Customer is not authorized to distribute any Software in Source Code form, except for software based on script based languages identified as redistributable in the applicable Notice File and open source software contributions, that form part of Customer's Runtime Configuration.

CUSTOMER'S SOFTWARE DISTRIBUTION RIGHTS UNDER THIS RBLA ARE LIMITED TO THE NUMBER OF COPIES OF RUNTIME CONFIGURATION SOFTWARE COMPONENTS EXPRESSLY AUTHORIZED BY THE ORDER PLACED DIRECTLY WITH BLACKBERRY OR ITS AUTHORIZED DISTRIBUTOR OR RESELLER.

3. **OTHER THIRD-PARTY LICENSING CONSIDERATIONS.** As outlined in the QDL, certain Software (including Runtime Components) have additional distribution terms and conditions due to pass-through requirements imposed by third party proprietary technologies they contain, and (including as relevant third-party open source software contributions that they contain). Please see QDL for additional information.
4. **HIGH RISK APPLICATIONS.** If Customer distributes, or allow others to distribute, any Runtime Component for use in or as a part of any Target Systems which may be deemed a High Risk Application (as defined in the QDL), then, Customer will maintain the following insurance for a period of 3 years after Customer's (or its channel partners') last distribution of the High Risk Application: Product Liability insurance and Professional Liability insurance in a form appropriate for the development, distribution, use and maintenance of Target Systems of the type being developed by Licensee, in each case having a minimum liability limit of US\$10,000,000 per claim and in the aggregate ("**Insurance Policies**"). The Insurance Policies must be placed with an insurer with an AM Best's rating of A- or better. The Insurance Policies must:
 - i) name BlackBerry as an Additional Insured;
 - ii) provide a Waiver of Subrogation in favour of BlackBerry, and
 - iii) be primary and non-contributing insurance policies.

Customer will provide BlackBerry with a minimum thirty (30) days' notice of cancellation, non-renewal, or material change of any of the Insurance Policies. Breach of this Section by Customer will be considered a material breach of this Agreement giving rise to BlackBerry's right to terminate for cause.

5. **SUBCONTRACTORS & DISTRIBUTORS.** Provided that Customer will remain responsible to BlackBerry at all times for the full performance of and compliance with all terms and conditions of the QDL and this RBLA, Customer may: (i) authorize subcontractors who have been retained by Customer to manufacture Target Systems on Customer behalf to exercise Customer's rights under Section 2(a), 2(b) and 2(d) on Customer's behalf, and (ii) sublicense Customer's rights under Section 2(c) to third party distributors in Customer's indirect distribution channel. All acts or omissions of Customer's subcontractors and distributors in relation to the terms and conditions of this RBLA will be deemed to be Customer's acts or omissions.
6. **EULA.** Customer must ensure that end users are presented with a properly completed version of the EULA, as provided in Appendix I of this RBLA, in a manner that follows the formalities necessary to make the terms and conditions enforceable under local laws for the countries in which the end users accepting the EULA reside. Notwithstanding the foregoing, Customer may distribute the Runtime Configuration without a EULA if: (i) Customer does not, itself, distribute a EULA to end users because it contrary to industry norms and would be commercially impractical; (ii) Customer exercises the same level of care that it uses in respect of its own parts of the Target System software, but not less than reasonable care, to: (a) protect BlackBerry's (and its licensors') rights in the Runtime Configuration by regulating and monitoring the manner in which Target Systems are distributed and updated; (b) protect the Runtime Configuration from being reproduced, modified, decompiled, disassembled, or otherwise reverse engineered, (c) minimize the potential liability of BlackBerry (and its licensors) in respect of any claim, suit or action commenced or maintained by any third party in respect of a customer's use or inability to use the Target System; and, (iii) Customer provides BlackBerry with reasonable assistance to enforce its rights (and those of its licensors) in the Runtime Configuration, including promptly advising BlackBerry of any Runtime Configuration intellectual property infringement of which it becomes aware.
7. **TARGET SYSTEM SUPPORT.** Customer is responsible for all Target System design, development, testing, distribution, support, maintenance, and updating. BlackBerry offers support for Software as described in and subject to the terms and conditions of the QDL. Custom engineering and enhanced support offerings are also available subject to additional terms and at additional cost.
8. **COMPLIANCE WITH LAWS.** Customer will comply with all applicable laws, rules and regulations and obtain all permits, licenses and authorizations or certificates that may be required in connection with Customer's (and its subcontractor's and distributor's) activities pursuant to this RBLA, including without limitation any import or export licenses required pursuant to the QDL and applicable law.
9. **PRESERVATION OF RIGHTS.** When distributing Target Systems and associated Runtime Components to any agency, department or unit of any government or quasi-government authority, Customer will take all actions and precautions consistent with the QDL requirements and all applicable laws and regulations specifically governing licensing to such entities to preserve and protect all ownership and other rights of BlackBerry and its licensors in the Software.
10. **RECORDS & AUDITS.** Customer will maintain accurate records regarding all of Customer's direct and indirect copying and distribution activities conducted pursuant to this RBLA for a period of six (6) years after the end of the year to which they relate. BlackBerry may request reports and conduct audits in order to confirm the number of copies of Software created (by Target System), the number of Target Systems shipped, and compliance with the terms and conditions of the RBLA, QDL, and the Order. If Customer has purchased Runtime Bundle Licenses for more than one Runtime Configuration, Customer must also identify copies by Runtime Configuration in all reports and audits requested pursuant to the QDL.

11. RESTRICTIONS AND REQUIREMENTS OF THE QDL AND WARRANTY DISCLAIMERS, INDEMNITY AND LIABILITY LIMITATIONS OF QDL. For clarity, Runtime Components of Software which are licensed for reproduction and distribution under the terms of this RBLA are subject to all the warranty disclaimers, indemnity and liability limitations and other requirements and restrictions of the QDL that have been described for other components of the Software and such terms apply to the Runtime Components licensed hereunder as modified and supplemented by the terms of this RBLA.
